

Aref Moradi

MACHINE LEARNING ENGINEER

☎ (+46) 764420508 | ✉ rfmrd619@gmail.com | 🏠 <https://redfungus.github.io/> | 🌐 redfungus | 📄 rfmrd

Skills

Programming Languages: Python, SQL, Bash, Java

Tools and Libraries PyTorch, Pytorch Lightning, AWS, Docker, Spark, Airflow, TensorFlow, Android

Theory: Linear Algebra, Reinforcement Learning, Statistical Machine Learning

Work Experience

Klarna

Stockholm, Sweden

MACHINE LEARNING ENGINEER - FULL TIME

January 2020 - Current

AI CONTENT MODELING TEAM

- Designed and developed model training and deployment pipelines using **Jenkins** and **AWS services** (e.g., AWS Lambda, AWS Sagemaker, AWS SQS)
- Researched, evaluated and implemented **Computer Vision** and **NLP** models for ad content tagging, creation and moderation
- Trained, evaluated and deployed image moderation model that achieved a **0.9 F1-score**
- Improved inference times of models by **50%** using appropriate **micro-service architectures** and **concurrency** in Python (**asyncio**)
- Facilitated the **on-boarding of 3 senior data scientists** by **leading** the establishment and documentation of service specifications, team coding practices, and team guidelines
- Led** team ML engineering efforts by ensuring high code quality and performance which has led to **2 domain-wide recognitions**

WEB AUTOMATION RESEARCH TEAM

- Implemented and evaluated the **FreeDOM** model from scratch and achieved a **0.95 F1-score** (Highest performance on average between evaluated models) which was a major part of the team research paper ([paper](#)) ([repo](#)) ([FreeDOM paper](#))
- Reduced training time of models by **60%** by using **IO optimizations** and **GPU training**
- Moderated weekly paper reading sessions to keep updated with state-of-the-art research
- Refactored **Reinforcement Learning** powered agent for performing tasks over the web (**DQN**) to reduce the development time of adding novel policies
- Designed and automated data pipelines for pre-processing **semi-structured** web page data into efficient tree data structures that enabled easy filtering of data based on language
- Wrote research proposals that resulted in **1 research grant** and **1 patent filing**
- Improved functionality and fixed bugs in Klarna's open-source Web Traversal Library ([repo](#))

DATA ENGINEER - PART TIME

Aug.2019 - Dec.2019

- Researched and identified the needs of analysts in the domain which led to aggregating **terabytes of purchase data** into summary tables for simplified access
- Developed and maintained **ETL** pipelines using **Amazon Redshift**, **Spark** and **Airflow**
- Implemented developer tools with preinstalled requirements using **Docker** which sped up analyst on-boarding

Divar

Tehran, Iran

DATA SCIENTIST/ENGINEER - FULL TIME

Sep.2017 - Sep. 2018

- Divar is the biggest Ad Marketplace in Iran with more than 10m monthly users. Divar is part of Cafe Bazaar holdings
- Performed **A/B test** for determining the location of chat button which led to **10% increase** in chat usage
- Implemented **Ad category classifier** based on text that achieved a **0.9% F1-score**
- System owner** of Metabase analytics dashboard (rotating ownerships every 3 months)
- Improved and maintained ETL pipelines for more than **100GB** of data per day using **Hadoop**, **Spark**, **Zeppelin** and **Airflow**
- Implemented chat data clustering and classification using **word2vec** and **fasttext** for generating pre-defined messages and visualizations using **t-sne** and **PCA**
- Conducted analyses on chat data used for data-driven choices in the team. Implementing a KPI dashboard using dash and plotly to give daily insights to members of the team and the product manager
- Scrum master** of chat team with great knowledge of agile scrum software processes and helped resolve communication problems in the team

- **Led** the design and implementation of a real-time Android chat client for the purpose of connecting buyers and sellers in Divar which resulted in a **promotion**
- Collaborated with **cross-functional team of 6 people** to ensure on-time delivery of chat feature (The whole process from design to deployment took **9 months**)
- **Mentored** junior Android Developer which resulted in delegating major tasks after **6 months** and completely taking over the Android client after deployment
- Designed and built modular code components using RxJava, event-driven programming, and android frameworks such as MVP
- Experienced in **OOP** best practices and writing **clean and maintainable** code

SpotYet

Stockholm, Sweden

CO-FOUNDER & FULLSTACK DEVELOPER - SLACKBOT FOR REMOTE CONNECTIONS

- SpotYet is a Slackbot for randomly matching people in Slack channels with fun ice-breakers and is currently used by more than **50 Slack work-spaces**
- Back-end development using AWS services such as **AWS Lambda** and **DynamoDB** and minor front-end development using **React**
- Identified customers' needs and business decisions for the SpotYet and SpotBot product
- Scrum master of a team of 6 people ensuring organized and routine team meetings

Research Experience

Klarna

Stockholm, Sweden

WEB AUTOMATION RESEARCH TEAM

- The Klarna Product Page Dataset: A Realistic Benchmark for Web Representation Learning ([paper](#)) ([repo](#))
- Collaborated with the Swedish Environmental Research Institute (IVL) and Klarna to create a carbon emissions estimator model for textile products as part of master thesis titled: Combining Learned and Analytical Models for Predicting CO2e Emissions in Textile Products ([paper](#))

Institute for Cognitive Sciences Studies

Tehran, Iran

INTERNSHIP

Aug. 2017 - Sep. 2017

- Analyzed neural activity signals of finger tapping using the **fNIRS** neural data acquisition device
- Translated and edited a Persian manual for future students of the institute

Education

KTH and TU/e

Stockholm, Sweden

MASTER'S DEGREE IN DATA SCIENCE

Sep. 2018 - Aug. 2020

- Double degree program in Data Science with a minor in Business and Entrepreneurship
- First year at TU/e, Second year at KTH
- Awarded EIT scholarship of excellence which included a tuition fee waiver

Amirkabir University of Technology

Tehran, Iran

B.S. IN SOFTWARE ENGINEERING

Sep. 2013 - Aug. 2018

- Ranked in the top 0.06% participants in the national university entrance exam (Konkour)
- Top 3 Technical Universities in Iran

Certificates

Nov. 2021 **TOEFL iBT**, Reading: 29 Listening: 30 Speaking: 30 Writing: 29 Total: 118

Oct. 2017 **GRE General**, Quantitative Reasoning: 167/170 Verbal Reasoning: 154/170 Analytical Writing: 5/6
